

SHORT BIO	Graduate student with 5 terms of experience TAing, 3 years as a Data Scientist in Brazil, and 2 years as a Machine Learning Engineer implementing solutions in PyTorch for healthcare applications. Contributed to open-source projects such as Dask and Dask-ML.		
EDUCATION	<b>University of Toronto</b>		
	<i>Electrical &amp; Computer Engineering</i>		
	Master of Applied Science (M.A.Sc.)		Starting Fall 2020
	Undergraduate Exchange Program (1 year)		2013 - 2014
	<b>Federal University of Santa Catarina, Brazil</b>		2010 - 2015
	<i>Bachelor of Science in Electronics Engineering</i>		
	First Class Honours, 99th percentile.		
AWARDS	<b>Vector Scholarship in Artificial Intelligence Recipient 2020-21</b>	2020	
	The Vector Scholarship in AI supports the recruitment of top students to AI-related master's programs in Ontario and is valued at \$17,500.		
	<a href="https://vectorinstitute.ai/aimasters">https://vectorinstitute.ai/aimasters</a>		
	<b>NSERC Applied Research Rapid Response to COVID-19 Grant</b>	2020	
	Our project titled "Canadian Hospital Simulator For Management of COVID19 Cases and Contact Tracing" was awarded \$75,000.00.		
	<a href="https://www.nserc-crsng.gc.ca/Innovate-Innover/CCI-COVID_eng.asp">https://www.nserc-crsng.gc.ca/Innovate-Innover/CCI-COVID_eng.asp</a>		
	<b>Virtual Design Challenge Winner</b>	2019	
	Won 1st place at the VDC hosted by The University of British Columbia with my paper <i>Proof of Novelty</i> . Received a cash prize of \$3,000.		
	<a href="https://github.com/dsevero/Proof-of-Novelty">https://github.com/dsevero/Proof-of-Novelty</a>		
	<b>Student Merit Award and Medal</b>	2015	
	Graduated with the highest GPA ever obtained (at the time) for my major. Elected "Best Student" by the faculty of Electrical & Electronics Engineering at the Federal University of Santa Catarina.		
	<b>Science Without Borders Scholarship</b>	2013	
	Awarded a full scholarship that covered tuition, transportation, necessary materials and living costs to study 2 academic semesters at the University of Toronto.		
TEACHING EXPERIENCE	<b>Federal University of Santa Catarina</b>		
	<i>Teaching Assistant</i>		
	Assisted professors by ministering tutorials, preparing lecture materials and helped students individually at regular office hours.		
	• <b>Communications Theory</b>	Fall and Winter 2015	
	Amplitude and frequency modulations; multiplexing; noise in communication systems; pulse modulation; analog-to-digital conversion; digital transmission in baseband and passband.		
	• <b>Introduction to Electronics</b>	Fall and Winter 2013	
	Operational amplifiers; diodes; the bipolar junction transistor; field effect transistors; optoelectronic components.		
	• <b>Single-Variable Calculus</b>	Fall 2010	
	Real-valued functions; limits; continuity; derivatives and applications; definite and indefinite integrals; integration techniques; improper integrals.		

	<b>CERTI Foundation</b> 2010 - 2013 <i>Intern Programming Instructor</i> Responsible for the technical training of new and current interns. Created a training course in LabVIEW programming that is still in use as of 2020.
<b>UNPUBLISHED RESEARCH</b>	Severo, Daniel (2019). <i>Proof of Novelty</i> . DOI: 10.6084/m9.figshare.10324883.v1. URL: <a href="https://figshare.com/articles/preprint/Proof_of_Novelty/10324883/1">https://figshare.com/articles/preprint/Proof_of_Novelty/10324883/1</a> . Severo, Daniel et al. (2019). <i>Ward2ICU: A Vital Signs Dataset of Inpatients from the General Ward</i> . arXiv: 1910.00752 [cs.LG].
<b>PROFESSIONAL SERVICE</b>	<b>NeurIPS 2019: Conference on Neural Information Processing Systems</b> Reviewer for the Machine Learning for Health (ML4H) workshop.
<b>OPEN SOURCE CONTRIBUTIONS</b>	<b>Dask: Scalable analytics in Python</b> <a href="https://github.com/dask/dask/pulls?q=author:dsevero">https://github.com/dask/dask/pulls?q=author:dsevero</a>  <b>Dask-ML: Scalable Machine Learn with Dask</b> <a href="https://github.com/dask/dask-ml/pulls?q=author:dsevero">https://github.com/dask/dask-ml/pulls?q=author:dsevero</a>  <b>Ward2ICU: A Vital Signs Dataset of Inpatients from the General Ward</b> <a href="https://github.com/3778/Ward2ICU">https://github.com/3778/Ward2ICU</a>
<b>PROFESSIONAL EXPERIENCE</b>	<b>Independent Contractor</b> 2018 - Current <i>Machine Learning Engineer &amp; Researcher</i> Developed a Fast Healthcare Interoperability Resources DataLake for running high volume machine learning models; Feature engineering and mathematical modeling for clustering algorithms used to segment patients into similar health groups; Ranked patients by future spendings using financial data achieving a precision at n=1,000 of 50% from a 15,000 total; Predicted patient LoS (Length of Stay) with regression techniques and hospital sensor data; Modified CoSimRank to create a similarity measure between developers and companies using Stack Overflow data using Neo4j and Python.
	<b>Linx Impulse</b> 2016 - 2018 <i>Head of Data Science</i> Developed recommendation algorithms for E-commerce customers; Provided ad-hoc big data analyses to find insights from our data; Designed and monitored competitive A/B experiments devised to validate our systems performance in the face of competition; Internal A/B testing tool using the SciPy and Jupyter stack; Bandit algorithms for online optimization
	<b>Wavetech Technology Solutions</b> 2015 <i>Embedded Systems Engineering Intern.</i> Worked on microcontroller programming in C/C++ for cochlear implants.
	<b>CERTI Foundation</b> 2010 - 2013 (Intern.) Implemented signal processing routines (filter design and realization) in C; Programmed back-end and front-end Python software for Raspberry Pi; Embedded eLua on a platform previously developed by CERTI. 2015 - 2016 (R. Eng)
	<b>WEG Industries</b> Summers 2011 and 2012 <i>Electrical Engineering Intern.</i> Software upgrade, in LabVIEW, of an automatic calibrator of multimeters in order to account for different input frequencies; Conception and implementation of a hardware and software (LabVIEW) system that acquires, processes and stores data of specific parameters of electric motors.
